

Readers' opinion: Majority rejects Bitcoin!

Retrieved Friday 31st of March 2017 07:51:41 PM

Again, we will publish your opinions, comments and questions. Thank you very much for your letters. It is always nice to see how many readers deal intensively with our thoughts. And have a clear opinion on this.

I would like to refer to my monthly [Pronomio-Letter](#). This will provide you with comprehensive information on key issues affecting your money. With analyzes and clear recommendations for action. We will show you how to protect your savings in the Pronomio letter. [U this link, you can subscribe to Pronomio-Brief as a reader of "Protection of assets" at a particularly low price.](#)

There are a number of factors that can be a problem in the market.

Thus by Dr. Dr. Hedwig R.

"Keep the Germans out." We have enough of wall building.

Ladies and gentlemen, Dr. R.,

I feel the same way. What a wall can do, we Germans. I am a little bit different. Thank you for your communication.

Or of S., which expresses itself against a wall building:

"Naturally." We finally had long enough ne wall !!!! "

Dear.

Thanks for your writing. See my comment above.

Gerald W. also rejected the construction of a wall with the following argument:

"Financially, this mammoth project for some money is certainly a lucrative business. Moally and ethically, I consider it unacceptable and reject it Then the famous Chinese Wall: a long time ago, but this is not the case In the end, nothing. "

Dear Mr. W.,

In my opinion, foreclosure and demarcation does not bring anything. Locking people has not brought anything. Only an open world in one has to deal with problems, of course, brings us further.

On the other hand, Jacqueline T. finds the construction of a wall quite reasonable:

"Why should it be reprehensible to participate in this building?" Trump protects his country and the people, whose goodn has vowed to defend. Unlike Merkel, who entertains the German people, lies and exploits! When it comes to me and my environment, we rebuild the German wall. And this without any pay! For our culture and the future of our children. With a g from Germany. "

Dear Mrs. T.,

With all respect, I see it quite differently. Surely one can criticize the politics, put fingers in the wounds, show maladministration. However, the construction of a wall does nothing. And certainly not the German economy. Our jobs. Our prosperity. And that's what's going on in our newsletters.

How a bomb hit the topic bitcoin. Most of our readers are not enthusiastic about the currency.

Thus Oskar L.:

"From Bitcoin I heard about it a couple of years ago, when they cost between 200 and 400 euros For an alternative to the paper money. "

Dear Mr L.,

Certainly the course development is impressive. And you could have earned a lot of money with it. I think it's a good thing. Even 200% I think is possible. Nevertheless, the risks are not underestimated.

A comment by Markus E.:

"Dear editorial team,

To your question what I think of Bitcoin: NOTHING! Virtual money has just as little value as virtual merchandise. Even if the management of the credit is protected against unauthorized access, I have no means of obtaining the necessary goods with credit. It is like a good-filled giro account from which I can neither withdraw nor transfer money, because the bank has no electricity or credit card is damaged. In times of crisis, only real values ??are appropriate for exchange against daily necessities.

Dear Mr. E.,

In fact, this is the biggest problem. In addition, all that is electronically handled can be monitored, tracked and controlled. The state can do so.

A comment by Wolfgang H .:

"Good day, Bitcon is even worse for me than the whole Fiatgeld.

Dear Mr. H.,

Surely not a bad choice to put money into precious metals!

To this end, G.:

"I think of electronic money (bitcoins) nothing at all! What if the total electr Important things in a threat by money evaluation

Dear G.:

See my comment above.

We have also received many comments on the dark clouds in the German economy.

For this, Konrad B.:

***"Globalization: Winner or Loser?" "It is not a good idea," he said, Many internal real existing "construction sites", eg in the
??poverty, refugee problems, road construction, new school buildings, part-time capped unemployment, healthcare, rents
covered corruption, etc. Germany has its problems Yourself. So help weaker Europeans to help prevent refugee flows.
"Self-confidence is called for and politically guaranteed justice, which means that, For example, millionaires are more likely
Financial co-responsibility. "***

Dear Mr B.,

I also think that we need to be more self-assured now. Germany has a strong economy, great employees and is highly regarded on
stage. I have lived in Germany for many years, I know how well Germans are seen abroad. Due to our history, however, it is also dif
fill this self-confident role.
